at Clockhouse!

Is it really important?

YES!

Geography is more than just a subject—it is a gateway to understanding the world and our place within it. By fostering curiosity, critical thinking, and global awareness, geography empowers students to become informed and responsible citizens who are equipped to navigate the complexities of the modern world. Through our engaging lessons and our wow learning opportunities, we aim to inspire a lifelong love of geography and a deep appreciation for the wonders of our planet

There has been some really exciting learning in Geography term!

Year 1 have been learning all about London life!

Year 2 have been learning about China.

Year 3 have been learning about volcanoes and earthquakes.

Year 4 have been learning about Climate change and its impact on our planet!

Our golden threads help us to link our learning!

What's beyond Collier Row?

What is wonderful about planet Earth?

In Year 1 the children have learnt all of the countries and capital cities of the UK. They have developed their map skills looking at aerial images, learnt about London landmarks and drawn comparisons with Brasillia.

I liked learning about how Brasilia is different to where we live!

I liked the maps
+ and

I have enjoyed our whole topic! I especially liked our China day and when we had challenges where we had to find things on our map of China!

In Year 2 the children have learnt all about China! They have looked at maps, studied the physical and human features there, as well as comparing their school day to one in Beijing!

They have also been learning about Chinese culture!

Year 3 have been learning all about the structure of the earth and the tectonic plates. They have learned how volcanoes are formed and erupt as well as the benefits and dangers of living near one. They then moved on to learning all about Earthquakes and how countries prone to them try to protect themselves!

When the Earthquake alarm sounds you have to duck and cover! It's really fun in school, but it would be really scary if you lived near a tectonic plate and your house might be destroyed!

In Year 4 have been learning all about different types of weather and how climate change is impacting the earth.

Whilst they have really enjoyed the topic, including their VR experience, lots of them have said it has made them really think about human impact on the earth. We are so proud of them for taking on the topic so maturely!

This topic has really made me think a lot, because before I didn't really think about how what I did could make a difference to other parts of the world. Now I think it's really important that we all think about making changes.
